detectors. Thus, Applicants respectfully request examination of claims 53-50 in addition to those of the provisionally elected Group II.

The claims of Groups I and II involve an important technical feature in common, as both groups relate to inductive detection of electrically charged particles. Applicants argue that the existence of this common technical feature renders the subject matter of Groups I and II close enough so as not to impose a significant burden by searching and examining the allegedly distinct inventions. Similar prior art would need to be compiled and analyzed for an evaluation of the patentability of the claims of both Group I and Group II. Accordingly, Applicants respectfully request reconsideration and withdrawal of the Examiner's election requirement.

#### CONCLUSION

In view of the foregoing, this case is considered to be in condition for allowance and passage to issuance is respectfully requested. If there are any outstanding issues related to restriction or patentability, the courtesy of a telephone call is requested, and the Examiner is invited to call to arrange a mutually convenient time.

It is believed that excess claims fees in the amount of \$200.00 for the addition of eight new claims is required. Therefore, please deduct this amount from Deposit Account No. 07-1969. If any additional fees are required, however, please also deduct all additional fees for this submission and any extension of time required from Deposit Account No. 07-1969.

Respectfully submitted,

Stephen B. Barone Reg. No. 53,968 Respectfully aubmitted,
